SUMMARY

Motivated Information Technology (IT) student with a solid foundation in programming and core computer science concepts. Proven ability to apply data structures and algorithms to solve real-world problems. Certified in tech entrepreneurship, demonstrating strong innovation and analytical skills.

EDUCATION

Bachelor of Information Technology (IT) | Expected Graduation: 2028

Egyptian Korean Faculty of Technology for Industry and Energy, Egypt

TECHNICAL SKILLS

- **Programming Languages:** C++, Java, Python, JavaScript
- **Web Development:** HTML, JavaScript (JS)
- **Core Concepts:** Data Structures, Problem Solving, Object-Oriented Programming (OOP)

ACADEMIC PROJECTS

Smart City Transportation System | *Role: Developer*

- Developed a software application to optimize urban traffic and transit management for a smart city model using C++.
- Integrated complex data structures to simulate short-path routing and manage real-time vehicle queues.
- Improved transit efficiency simulation and reduced simulated traffic congestion by restructuring data algorithms.

CERTIFICATIONS & TRAINING

InnovEgypt Program | Information Technology Industry Development Agency (ITIDA) & TIEC

Completed intensive training focused on technological innovation, entrepreneurship, and tech management.

LANGUAGES

- **Arabic:** Native Speaker
- **English:** Upper-Intermediate (B2)
